

CHRIS ROOS & ASSOCIATES

ENGINEERING & CONSTRUCTION LAW

| Consulting, Support & Retainer
Services

| Adjudication & Arbitration

| Training & Development

| Project Staffing

| Vision

To become the Boutique Advisory & commercial partner of choice, specializing exclusively in engineering & construction contract law.

| Mission

To provide a total commercial solution to our clients for all their engineering & construction, commercial and legal needs.

To give access to our fully accredited and internationally endorsed engineering and construction law programmes to all role players, business and individual professionals throughout Africa.

To be the leading contributor of skills development for all stakeholders in the built industry.

| Advocate Chris Roos

It only takes one meeting with the man at the helm of CHRIS ROOS & ASSOCIATES to realise that this CEO is not your average executive - unconventional and modern thinker. Chris brings with him 28 years of large capital project and programme experience and an in-depth understanding of commercial law, engineering & construction practices.

De Beers Avenue, Paardevlei
Somerset West, Cape Town

| Adjudication & Arbitration

Synonymous with Adjudication, Arbitration and Dispute Resolution for the Engineering and Construction sectors in Africa, we're often the most referred (and preferred) choice for employers, contractors and consumers in both the private and public sectors.

Well-versed in the latest local and global arbitration practices and codes, we assist, offer expert intermediary advice, or physical representation. Here, our area of specific expertise is usually within the scope of pre-contractual terms of an agreement, such as of the JBCC, GCC, NEC3/4 and FIDIC suite of contracts.

The services we offer here often include advice, promotion and defence of claims, dispute negotiations, and expert advisory services for attorneys or legal counsel.

| Tender & Contract Support

Tender and contract development for engineering, procuring, building or maintaining infrastructure is a complex necessity of the Built industry, requiring a variety of skilled, sure-footed specialists.

Many clients know that if they outsource their front-end planning, commercial structuring and bid documentation to us they'll be freed to focus on their operations, rather than on an arduous 'paper-chase'.

Our wealth of knowledge and specialist experience ensures that a well-developed, professionally drafted tender and contract data pack for a bid is always delivered.

And after a bid, through the post-contract award phase to project close-out, we continue to provide commercial support options, from contract management staff, to cost-effective retainer services

| Training & Development

Enabling and equipping the diverse community of Built-industry role-players like engineers, contractors, project managers, architects, quantity surveyors and procurement officials is one of our company's key focuses.

We regularly conduct in-house training (or tailor-made courses) for larger corporate groups, but also offer similar training at some 40 public seminars every year, staged in centres nationally and abroad.

Our seminars cover critical, industry-related topics, including the four key CIDB-approved contracts (JBCC, GCC, NEC & FIDIC), CIDB Prescripts, Construction Regulations, and other topics.

Our courses all enjoy international endorsement from the Business School of Netherlands, with local CPD Points accreditation from ECSA, ASAQS, SACAP and SACPCMP.

| Retainer Services & Staff

As part of our vision to support and enable small, medium and large enterprises, we offer a variety of tailored retainer and service level agreements.

These allow for affordable access to specialist legal advice and priority assistance from our pool of associates: Your own in-house legal commercial advisor, but sans the burden of extra overheads!

Use of retainer hours is up to each subscriber but it can include consultations at our premises, telephonic and email correspondence, letter drafting as well as 24/7 access to legal opinion and commercial advice.

We also offer a variety of ad hoc and outsourced staffing solutions for the duration of specific projects or needs such as Tender & Contract development.
